## SUMMARY

---

Has 6+ years of programming experience, 5+ years of specialized experience in frontend, 3+ years of Team Leadership (3+ ppl). Uses Next.js and Nuxt.js

Technical Skills: Javascript/Typescript, React.js, Vue.js, Node.js, HTML, CSS, GIT etc.

Experienced with Algorithms and data structures.

Recent personal achievement: Initiated and orchestrated the formation of a small group within the company, dedicated to enhancing our Computer Science knowledge.

## WORK EXPERIENCE

---

### Digital Wave Technology

Nov 2023 - Present

– /Stack/: Vue, Pinia, Node.js, graphQL

\* Key Responsibilities:

- Pricing system development;
- Discussing product requirements with the CEO;
- Conducting code reviews for colleagues;
- Deep involvement in a unique product;
- Developing components based on clients' requirements;
- Fixing bugs on the frontend as well as the backend;
- Participating in coding interviews;

\* Achievements:

- Investigated Camunda environment and integrated it with our system;
- Developed a fully custom control panel for Camunda Modeler;
- Developed many complicated components like search with autocomplete.

### DEXART

Jul 2022 - Nov 2023

– /Stack/: Vue, Nuxt, Vercel, Git, CI/CD, OAuth, web3, SSR, BFF

\* Team and Role Context:

- Key developer in a compact frontend team, consisting of fewer than 5 professionals.
- Tasked with the coordination and assignment of frontend-specific duties among a three-person subset of the larger team.
- Regular connect with backend specialists to ensure seamless integration and functionality.

\* Key Responsibilities:

- Managed the development and maintenance of a 2D map interface in Unity
- Successfully rolled out the dex.art project within stipulated timelines.
- Engineered a unified system for user authentication and registration, leveraging OAuth, web3, and standard credential methodologies.
- Developed multi-language support (in excess of five languages), resulting in a twofold surge in advertisement conversions.

\* Achievements:

- Played a pivotal role in the transition from Nuxt 2 to Nuxt 3, ensuring continuity and efficiency.
- Played a pivotal role in enhancing the application's performance, significantly reducing bundle sizes and accelerating website load times.

## OTON Technology

Dec 2017 - Jul 2022

– /Stack/: React, Next, Vue.js, Node.js, pm2

### \* Main Tasks:

- Develop and maintain new frontend solution for manage network business on the web3 technologies.
- Make a web store which support server-side rendering and ready to high load of visitors.
- Backend Collaboration: Maintained a continuous dialogue with the backend team to craft cohesive and robust solutions in tandem with frontend requirements.

### \* Results:

- Successfully developed back office frontend solution using React.js on a client and simple static node.js server on a backend which was later transitioned to Vue and some cloud solution for backend. It boosted stability and expedited feature development.
- Oton Market was a big and interesting project and after we finished this project we closed all business requests. I got 2 junior frontend developers in my team.

## TradeSoft Company

May 2017 - Dec 2017

### \* Context

- Junior frontend developer
- Studied some technologies like: Vue.js, Docker, Linux, REST API, CI/CD, agile methodology and tests.
- Collaborated with the backend team to address frontend requirements and integration points.

### \* Results:

- Played a key role in enhancing the "Parts-Catalogs" frontend, resulting in a more interactive and user-friendly product.
- Demonstrated significant growth and skill acquisition in a challenging and fast-paced environment.
- Contributed to the project's overall success, with "Parts-Catalogs" witnessing increased usability and customer satisfaction during my tenure.

## PROJECTS

---

### Some Project

The result of my work in Dexart company. Has over than 20k users every day. Technology frontend foundation is Nuxt+Vercel. Recently was refactored to latest Nuxt.js version and optimized for high load

## EDUCATION

---

2014 - 2016 Diploma in Information Technology (Incomplete) at **Kirov Aviation College**

## SKILLS

---

Some Skills      Typescript, Javascript, React, Vue, Next, Nuxt, HTML, CSS, REST, SSR, Algorithms, OAuth, BFF, mobx etc.

Some More Skills      English(B1), Russian(Native), Problem-solving, Self-Motivated etc.
